

TeleCMI

Technologies Private Limited

Channel Partner Program

People | Partnership | Performance

TeleCMI is one of the leading cloud telephony company based on chennai, india. We deliver high quality communication products that suit to startups, SME's and Enterprises.

Virtual Number

Virtual number is a mobile number or landline number through which your customers can reach your business anytime. TeleCMI's virtual number comes up with features like receive and handle concurrent business calls, Connect your entire team in a single virtual number, Track call history and Review call recordings in the dashboard.

Toll Free Number

A toll-free number increases the branding of any business through which your customers can easily remember and reach your sales or support center anytime with ease of reaching your business with no-cost. Toll-free numbers gives your business a nationwide reach and recognition.

PIOPIY Developer Telephony (Phone Call API)

Integrate never imagined communication features through our SMS, voice and internet calling through PIOPIY API. It reduces the amount of time for scripting and coding. Suits best for enterprise grade business solutions. Start integrating PIOPIY API in your application in less than an hour with no infrastructure.

Missed Call Service

Missed call solution is the easiest way to generate new business leads. It is one of the cost-effective marketing techniques for business promotions. No-cost for customers for giving a missed call. After receiving a missed call from a customer, the customer will receive an acknowledgment SMS.

Auto Dialer

Integrate powerful outbound calling platform using TeleCMI's auto dialer. It saves time, increases business productivity and customer engagement. It will replace the traditional way of dialing calls one after one manually. It maintains the call history, call recording and statistics of all agents in the dashboard.

Intercom

Intercom systems are mandate for all in house business models. TeleCMI's intercom setup in cloud replaces the traditional wired intercom setup with hardware. No infrastructure required. Connect all your departments through extensions. Review call details in the dashboard.
